**Technical Specification:** Attention to detail and quality design are the hallmarks of Beaver and Tapley products. All information contained in this document was correct at the time of going to press. However, within its policy of continuous improvement Beaver and Tapley reserves the right to alter specifications without notice.

**Matching:** Beaver and Tapley is veneered with real wood from real trees. Consequently, with all finishes, there is all the variation in colour and graining which is the hallmark of a natural product. This means that only rarely will there be an exact match between new pieces and perhaps even less often between older pieces and new additions. However, exposure to daylight over

a long period alters the colour and after some months both veneers and solid edges will mellow to a more uniform shade. The patches sometimes found on solid teak edges will also fade away.

Even though Light Oak and Warm Oak are a slight coloured stain, there can be quite marked variations in shade, and more importantly in grain pattern. It must also be appreciated that though the doors and drawer fronts on any one cabinet are through veneered as a numbered set, the separate pieces making up an order cannot be specifically matched. We do of course make every effort in both buying and laying veneers to ensure the greatest possible consistency.

**RETAIL (1<sup>st</sup> January 2022)**

Prices are shown in Pounds Sterling, the retail prices are for use as a guide only. They include VAT at 20% and apply to the UK mainland. Beaver and Tapley reserve the right to alter its selling price without notice at any time.
